**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. An Amendment was filed 7/12/05 in which Claims 4 and 17 were also cancelled. The Claims presented for examination are 1, 2, 5-15, 18-20.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5-7, 14 and 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Katsuhisa et al, Japan 2001 30921A.

Katsuhisa discloses a transfer ratio varying apparatus for a vehicle comprising  
Actuator (unidentified; "steering device" described beginning with p4, "Subject of the Invention"),

Steering shaft 2 transmitting an angle of a steering wheel (unidentified, inherent)

Damper 5 positioned at the steering shaft to absorb vibration caused by the actuator (p4, "Subject of the Invention"),

Flexible coupling 1 connecting an input portion 3 of the actuator, and steering shaft 2, comprising

First yoke 11 fixed at steering shaft 2,

Main body 1 with elastic member, fixed to the yoke by first bolt 22 extending along an axis of the yoke, the body composed at least in part of rubber (i.e., element 7), and at least in part of a metal (i.e., element 6),

Second yoke 31 fixed at the body by second fastener (unidentified), and fixed at the input part (adjacent steering shaft 2),

The damper being fixed to the first yoke by the first bolt.

Art Unit: 3611

3. **Claims 2, 8-13, 15 are allowable** because prior art does not disclose the invention described above further comprising the actuator as including an input shaft that rotates with a housing.

4. The prior art found pertinent to the disclosure, but not relied upon, includes: Yamamori et al 6848535, Hong 5503240, Gutkowski et al 5226498.

5. RESPONSE TO REMARKS

Upon reconsideration, Examiner has provided new rejections for several claims, employing Katsuhisa as disclosing the respective recited elements. She *sincerely apologizes* for the inconvenience.
